

Organic gardening is good for you!

Gardening reduces anxiety and stress.

Gardening is good exercise!

Organic gardening also:

- Reduces human contact with pesticides
- Improves soil quality
- Reduces water contamination

Comments?

How are bee brains and your brain the same?

Bee brains and human brains use chemical and electric signals to communicate.

Pesticides stop both human and bee brain cells from communicating with each other.

In humans, pesticides are linked to lower IQ and developmental problems in kids, and infertility and cancer in adults.

What foods have the most pesticides?

A poster titled "EWG's 2017 Dirty Dozen" listing the top 12 most pesticide-laden foods. The list is presented in two columns on a dark background with various food illustrations. The top of the poster features the EWG logo and the text "EWG's 2017". The title "Dirty Dozen" is written in a large, white, brush-stroke font. The list items are numbered 1 through 12. The background includes illustrations of strawberries, a tomato, a bell pepper, celery, a peach, an apple, and a bunch of grapes.

EWG's 2017
